Select General Bridge Installation Instructions
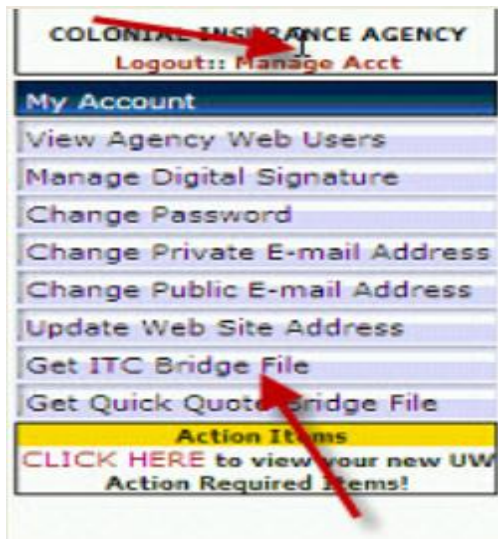

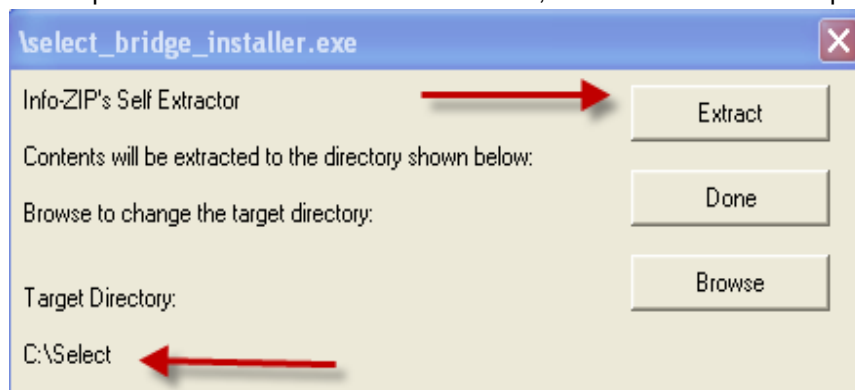

1. You will need to go to Select General's website and login at: https://www.selectgeneral.com/prod/.
2. Click on **Get ITC Bridge File** on the **My Account** menu.

3. Click on the **Extract** button on the upper right side of the screen (we recommend that you install this file to the default path shown on this screen: **C:\Select**, since this is the default path that the Comparative Rater uses).

4. You will receive a message that all files have been extracted, click **OK**.
5. To close the bridge installer screen, click on **Done.**
6. You may now bridge your quotes from the Comparative Rater to Select General.
